19. Release Affected by this Change: N/A		20. Date due to Customer: 06/01/2002		21. Estimated Cost: None - Under 100K

23. Problem: (use additional Sheets if necessary) Rational Rose installation in the EDF is outdated (Rose 98). Need to install Rational Rose 2002e in the EDF for Synergy and other efforts. Rose 2002e has integrated Java tools, and a newer feature called "Round-Trip Engineering" that automatically synchronizes changes in code and models.						
24. Proposed Solution: (use additional sheets if necessary) Install Rational Rose 2002e in the EDF in NFS automounted location for Solaris 8 only. Rational Rose is a Raytheon-purchased and licensed product, and requires no intervention by EDS for licensing or media.						
25. Alternate Solution: (use additional sheets if necessary) Continue to use outdated Rose 98 and TogetherSoft.						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) Less productive Java design and coding. Potential for poor support for Rational Rose 98 support as it is behind several versions.						
27. Justification for Emergency (If Block 15 is "Emergency"):
